Re: Redemptive Strategies Broadcasting, LLC (RSB)  
WCSZ(AM), Sans Souci, SC  
Facility Identification Number: 25235  
Special Temporary Authority (STA)  
BESTA- 20190320ABG

Dear Mr. Cherry:

This is in reference to the request filed on March 20, 2019. RSB requests a further extension of the STA granted on August 9, 2013, to continue operating ND with reduced power to allow time to complete all required repairs/modifications, including replacing the 50 kW daytime transmitter.<sup>1</sup> In support of the request, we noted that RSB did not resume licensed operations over the past six months.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and RSB may continue to operate ND using tower #2 (ASRN #1055339) using reduced power daytime and a maximum of 0.375 kW at night. RSB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310. RSB must submit an e-mail to certify the date the station resumed

---

<sup>1</sup> WCSZ(AM) is licensed for operation on 1070 kHz with 50 kW day (ND) and 1.5 kW night (DA).

licensed operations per BMML-20120925AXN with negligible changes, or to state an FCC Form 301 application has been filed to make any other type of changes (such as permanently reducing power to reduce costs).

This authority expires on **October 3, 2019**.

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'J' followed by a series of loops and a long horizontal stroke extending to the right.

Joseph Szczesny, Engineer
